

### **2.2.3 Institution facilitates building and sustenance of innate talent /aptitude of individual students (extramural activities/beyond the classroom activities such as student clubs, cultural societies, etc)**

Shri Chamundamata Homoeopathic Medical College and Hospital, Jalgaon works hard to encourage and develop each student's natural qualities in a range of areas, including athletics, applied arts, literary skills, leadership, and cooperation.

In addition to providing monetary and technical assistance to students with natural abilities, the organisation considers the development of their aptitude by providing trainers, coaches, and facilitators for a variety of activities that aid in tutoring, guiding, and grooming the students for the aforementioned elements through the events, programmes, and activities listed below.

Every year, the college hosts a sports week where students compete in sports like volleyball, throw ball, cricket, and athletics.

The college's cultural events comprise group & solo dance, singing, mimicry, theatre with orchestra and choreographer. To respect the diverse states' varied cultures, folk values, and customs, traditional dances and remixes are performed. Granting students health, grace, agility, the goodness of the soul, and mental harmony in the process.

Seminars on personality development are held to help students improve their soft skills. Students are given opportunities to paint on walls, make rangolis to represent the rich culture of Maharashtra and to welcome optimism and festivity on occasions like Teachers' Day, Hahnemann Day, national days, and cultural gatherings.

Through the use of the workshop and literature, students acquire a spiritual dimension. Facilitating new learning is achieved through organizing conferences, seminars, workshops, and talks by specialists on current advancements.

Our students become more health conscious as a result of World TB Day, AIDS Day, Yoga Day, and WHO Day celebrations.

Students are urged to engage in blood donation camps. It encourages students to perform such life-saving deeds and helps them cultivate a generous mentality. The college uses NSS to organize medical camps and awareness campaigns to develop the socio-cultural talents of its students. Students' aptitude for environmental protection is encouraged by tree planting activities during the monsoon season, which also fosters relationships with the community

and case-receiving ability. Students participate universally in the tree-planting exercise even though it is optional.

Project-based learning helps students develop their creativity and natural aptitude, particularly when it comes to preparing for their Herbarium Project in the Homoeopathic Pharmacy course.

At every level, students are developed with a positive learning attitude, hidden potential, and leadership skills through student councils and decision-making partnerships.

The institute additionally aids in the development of research aptitude by offering possibilities for interns to take part in STSH (Short-Term Research Projects) and by assigning them a required research project to complete during their internship.

This encapsulates how SCHMCH facilitates the development of students' artistic, cultural, and spiritual aspects to enable them to become the best versions of themselves.
