

4.5.2: There are established systems and procedures for maintaining and utilizing physical, academic and support facilities - laboratory, library, sports facilities, computers, classrooms etc.

Infrastructure Maintenance, Additions, and Alterations

The Institute has a well-established set of rules and procedures in place for the preservation of its physical, academic, and support facilities. These facilities include laboratories, libraries, sports complexes, computers, and classrooms.

1. Maintenance of computers. The individual in the role of ICT Resource Manager and IT In charge is responsible for managing and overseeing IT-related tasks and responsibilities.
2. A competent civil engineer is responsible for managing any additions or modifications to the infrastructure.
3. Electrician conducts electrical repairs.
4. Resolves plumbing problems. Internal maintenance work is performed. On-call maintenance is performed in the event of a breakdown.
5. Regular preventative maintenance is conducted on the computer center, laboratory equipment, plumbing, and electrical facilities to prevent malfunctions.
6. Housekeeping personnel are employed to ensure 24/7 upkeep and daily cleaning.

Additional maintenance: Regular servicing and upkeep of the centralized shared amenities such as the RO purifier, water coolers, DG set, CCTV, firefighting system, and transformer are conducted.

The gardener is responsible for maintaining the Garden & Herbarium garden. The cleaning team diligently performs daily sweeping and sanitization of the campus interiors. (Schedule, diagram for sanitation and upkeep).

There are five classrooms that have a seating capacity of 100 each and are equipped with ICT technology. Each classroom is equipped with an LCD projector. Prior to the start of each semester, a thorough inspection of all classrooms is conducted, and any required repairs to benches, fans, or ICT-based equipment are carried out.

A dedicated lab supervisor is responsible for the upkeep of computers in the classroom. logbook

Campus security: 24/7 multipoint security service is available. This security service encompasses the infrastructure and hostel buildings, and it is contracted out to Seven Group Guards.

The security system is enhanced with closed-circuit television (CCTV) cameras.

Budget Allocation: The Institute assigns funds for the upkeep of physical, academic, and support facilities.

Generator: An Annual Maintenance Contract (AMC) is offered for generator maintenance.

Laboratory maintenance: The assigned peon carries out daily cleaning tasks.

The auditorium is used for conducting various programs and seminars related to value-added certification programs, clinical practice, methods of homeopathic treatment, and students' clinical presentations in the fields of obstetrics and gynaecology, surgery, and medicine. These presentations are reviewed by the professors. Additional off-campus seminars, visiting scholars, and multidisciplinary seminars were organized.

Laboratories are used for students to conduct practical experiments in anatomy, physiology, biochemistry, homoeopathic pharmacy, and pathology.

A library is a place where books and other materials are stored and made available for borrowing or reference. The library offers both physical and digital items for anyone to access. Students find it beneficial to subscribe. The system effectively manages and organizes records.

A sports facility Within the campus, there is a playground designated for outdoor activities, where students engage in recreational games after their academic hours. The ground is employed for annual sporting events, contests, Sports Day festivities, preparation for marching in formation, and public celebrations.

Computing facility A faculty member specializing in information technology teaches courses pertaining to IT.

The pupils engage in perusing the university findings and making preparations for their presentation.
