7.1.5 WATER CONSERVATION

➤ BORE WELL: -

Bore wells are well's that are dug deep into the ground to reach water bearing rock or soil layers, these are known as aquifers. Bore well are typically responsible for arrowing feathering rock layers several feet below the surface of the ground, where in water is trapped under pressure between the rock's their cracks.

In our campus Benefits of Bore well is which is provided to reliable water supply Bore wells provided a consistent source of water, even during dry season, also making them ideal for irrigation and domestic use. Also the our not use water or Raining water also goal to Bore well that is water conservation also maintains.

Conclusion is that, the Bore well system is a valuable Solution for accessing ground water reserves providing a consistent and reliable source of water for various needs to campus.

WATER CONSERVATION

➤ WASTE WATER RECYCLING: -

In our college RO water plant is established for purifying water. In this RO water waste. Water can have produced in large quantity. For those saving and reusing waste water from a water filter can be good way to reduce water wastage and make more efficient use of water resources. Here are few steps you can save & reuse the waste water from your water filter.

1) COLLECT THE WASTE WATER: -

Place a container the water filter's waste water outlet to collect the water that is being discarded Make sure the container is clean & suitable for sharing water.

2) REUSE THE WASTE WATER: -

There are several ways you can reuse the waste water from your campus.

A) WATERING PLANTS: -

Use the waste water to water your plants or garden. This can be a great way to make use & the water instead of letting it go to waste.

B) FOR WASHING CLOTH'S / CLEANING: -

You can use the waste water for cleaning purpose such as mopping floors, Washing our Car's Cloth's etc.

AND LAST: -

Regularly check the quality of the stored waste water to ensure it remains suitable for the intended use. And we remember that the waste water from a water filtration may not be suitable for drinking or cooking purpose. So it's important to use it for non-portable purpose only.
